20' x 20'	N/A		N/A		\$8,895	12'-4"

A great country look. This model is very popular with horse ranches, large properties, and those who just like the western look. It has an extra high center which is perfect for storing taller items.

The look of a country barn without the height requirement of the Tall Gambrel. This model comes standard with 6' tall sidewalls, however the roof profile goes up in height rapidly so that this shed is similar to the Tall Peak model in overall height and volume.

			10'x10'	\$1,695
			10'x12'	\$1,995

ECONOMY

The Economy Series is a quality built wood shed with a few less features than our other shed styles. The main differences are:

Floor The floor consists of 2 x 4 @ 16" o.c. joists laid directly on the base (ground or concrete, whatever is provided by owner) with 7/16" osb floor sheathing on top of joists. While not as heavy duty as our normal shed it is adequate for most light storage needs.

Roof Edge The roof edge does not have an overhang or fascia. This is a decorative feature only. The roof is still guaranteed not to leak.

Height The interior sidewall height is 6'.

Warranty The Economy Series is backed by a (1) year warranty.

Options The same options available on our other sheds are also available on the Economy Series.

WWW.SOCALSHEDS.COM

TALL PEAK

Shown with optional steel door and windows.

Our best selling shed, the Tall Peak has a contemporary design that fits well with most newer home designs. The center height is taller and varies depending on the width of the shed. This shed comes with a standard swing-out wood door 43" wide x 6'4" tall. Larger versions of this shed can be used as garages with a concrete slab floor.

TALL GAMBREL

Shown with optional double door and window.

This shed is one of our most popular models. With standard 8' sidewall height (most of our competitors charge extra for this) and a classic barn profile that means a high ceiling and lots of storage volume. This model allows for the addition of storage lofts up high for added storage area without using up all that valuable floor space.

LEAN-TO

Shown with optional windows.

Lean-To sheds have the versatility to fit into tight spaces while remaining a great looking shed in its own right! The single direction sloped roof lends itself to narrow spaces such as your side yard while shedding water away from the house. The height and roof slope can be easily altered, as needed, to fit below eaves of your home or even mobile home awnings.

PEAK PORCH

Shown with optional windows and porch rail.

A combination of our PEAK and PORCH models, this shed comes with a standard 5/12 roof pitch on the main section. The porch deck comes standard with 2 x 6 douglas fir but can be upgraded to composite decking for an additional fee.

16'x16'	\$7,495	11'-10"
16'x20'	\$8,895	11'-10"

BARN PORCH

Shown with optional french door and windows.

The Barn Porch design is the result of customers needing the added storage space of a Tall Gambrel but also desiring the character of a porch shed. The result is a nice "rustic country" appearance and feel. The standard porch is 4 feet deep x the length of the shed although the depth can be increased.

SIZES	PRICE	HEIGHT

16'x20'	\$8,895	13'-1"

TACK SHED

Shown with optional double door.

The Tack Shed is a variation of a Tall Peak shed design. We have increased the height of the sidewalls and converted part of one side into a covered storage porch to store hay and feed off the ground and protected from the rain. The size of the porch and shed sections can be changed to meet your particular storage needs. Use the inside to store saddles, tack, tools, or as a work area.
